

ARVP

NEWSLETTER

MAY 31, 2023

Welcome Back!

Hey there! You might be wondering what this is. Oh boy here we go again, another spam email that I never signed up for...

But we hope you'll stay and we welcome you to ARVP's new monthly newsletter!

We created this in order for our members, sponsors, and any curious onlookers to know what we're up to at ARVP. This newsletter will include tasks we've accomplished in the last month, social events, and some exclusive insight into what our members have been doing. So welcome to our newsletter and if you have any comments or feedback, please contact us at contact@arvp.org. We'd love to hear it!

ACCOMPLISHED TASKS ✓

- ✓ Published our first newsletter!
- ✓ Gathered 10.8k images to train ARCTOS' vision model!
- ✓ Pool test event for Lacombe High School Robotics Club!

MEMBER QUOTE 😎

- "We're gonna do such a business."*
- *Nathan Chong (Project Co-Lead & Admin Lead)*

Newsletter Insight

Like our newsletter? Pretty neat, eh? It only took our Admin members about two weeks to brainstorm, flesh out, and design! Where we really struggled was making our custom design work on various different mailing sites through an HTML embed! In the end, we weren't able to make it work :(

HOWEVER, we did find a nice alternative; MailerLite! In addition to some other nice places to share our newsletter to ;)

If you're curious about our original design, go check it out on our website at arvp.org! You can also checkout our newsletter on [LinkedIn](#).

Community High School Outreach

Checkout our pool test event we held this month. Thank you again for the honey Lacombe High School Robotics Club!

ARVP has continued to seek community outreach opportunities to foster interest in STEM-related fields, with a focus on robotics and autonomous systems. As a continuation of our commitment to this, we continued our tradition of conducting outreach events at local high schools here in Edmonton. This outreach event was a super fun experience, where we not only had the opportunity to promote what we do at ARVP but also helped further their interest in robotics. We loved hanging out with Lacombe Highschool and would love to see y'all again in the future!
